EDUCATION

New York University, College of Arts & Science

Expected May 2027

Bachelor's degree in Computer Science; Minor in Data Science

New York, NY

- **Relevant Coursework:** Agile Software & DevOps, Operating System, Algorithms, Natural Language Processing, Big Data Analysis
Computer System Org, Programming Tools for Data Scientists, Principle of Data Science, Linear Algebra, Discrete Math

WORK EXPERIENCE

TikTok

May 2026 – Aug 2026

AI Engineer Intern

Seoul, KR

- Built the Korea team's first **internal marketing diagnostic tool**, integrating 8 datasets into a Python service that generates account-level hygiene reports in 1 minute, replacing a 15+ query, one-hour process and enabling daily team use
- Designed a **multi-stage LLM pipeline** to label 3,000+ ad creatives per account and audit TikTok best practices, decomposing analysis into focused prompts to generate optimization recommendations for 20+ enterprise clients
- Created an **all-in-one internal AI guide** of use cases and prompts adopted by 100+ employees and led an **AI Learning Series** whose two sessions ranked 1st and 2nd among the organization's internal Masterclasses that year

Planfit

Mar 2025 – Dec 2025

Product Engineer Intern

Seoul, KR

- Developed a **personalized stretching recommendation** feature with Django and React Native, scoring exercises against workout history and injury areas; A/B tested and shipped, increasing activation by 12% and subscriptions by 8%
- Implemented a **competition-based leaderboard** feature within the existing production codebase, owning discovery, development, and post-launch iteration; increased community engagement by 20% and supported 300+ user-created clubs
- Engineered an **LLM-powered pipeline** to classify 1,000+ VOC items and prioritize recurring issues; validated pain points through 20+ user interviews, wrote the PRD, and implemented fixes in subsequent sprints

Parachute

Mar 2024 – Jun 2024

AI Engineer Intern

Houston, TX

- Evaluated **RAG architectures and vector database** options (FAISS, Pinecone, Elasticsearch) against cost, latency, and integration complexity to select the stack for a career coaching chatbot MVP
- Built **Python ETL pipelines** for automated resume parsing, improving mentor-mentee **matching time by 18%**

PROJECTS

myIndigo

Apr 2026

Full-Stack Developer & AI Engineer

AI Hackathon @ NYU&Google

- Built an **end-to-end real-time audio pipeline** (PCM16 streaming via WebSocket, FastAPI) that classifies ambient sounds via Gemini 2.5 Flash and Google ADK multi-agent orchestration, delivering actionable alerts to iPhone and Apple Watch
- **Technologies Used:** Google ADK, Gemini 2.5 Flash, Web Audio API, FastAPI, WebSocket, Python, React

Automated A/B Testing System

Oct 2025

Product Engineer

Hackathon @ Planfit

- Engineered a **full-stack A/B testing system** that automatically rotates localized variants (country- and segment-matched copy translations) based on performance, driving CTA conversion +20% and subscription conversion +8%
- **Technologies Used:** n8n, Make.com, Amplitude, Claude Code, GPT API, Django REST APIs, React Native, Google Spreadsheet

TECHNICAL SKILLS & TOOLS

- **Languages:** Python, Java, TypeScript, JavaScript, SQL
- **Frameworks & Infra:** React, React Native, Django, FastAPI, Node.js, REST APIs, Supabase, AWS, Vercel, Docker, Git, CI/CD
- **AI:** LLM API Integration (OpenAI, Anthropic), Prompt Engineering, RAG, MCP, Agent Orchestration (Google ADK)
- **Product:** User Interviews, A/B testing, Funnel Analysis, PRD Development, Amplitude, Figma, Linear, n8n, Make.com, Lovable
