EDUCATION

New York University, College of Arts & Science

Expected May 2027

Bachelor's degree in Computer Science; Minor in Data Science

New York, NY

- **Relevant Coursework:** Agile Software & DevOps, Operating System, Algorithms, Natural Language Processing, Big Data Analysis
Computer System Org, Programming Tools for Data Scientists, Programming with AI-Assistant, Linear Algebra, Discrete Math

WORK EXPERIENCE

TikTok

May 2026 – Aug 2026

AI Engineer Intern

Seoul, KR

- Built the Korea team's first **marketing hygiene check tool**, partnering with Solutions Engineers and Industry Ops to integrate 8 data sources into a Python/SQL service that flags account-level issues with LLMs, cutting reporting from 1 hour to 1 minute
- Designed an **agentic workflow that diagnoses ad creative performance**, connecting data sources, labeling 3,000+ creatives per account through Chrome MCP, and running analysis against TikTok best practices to deliver reports to 20+ enterprise clients
- Led an **AI Learning Series** for the GBS team and collaborated with TikTok Japan to build an **Internal AI Tool Playbook** adopted by 100+ employees; the two sessions ranked 1st and 2nd among internal Masterclasses that year

Planfit

Mar 2025 – Dec 2025

Product Engineer Intern

Seoul, KR

- Owned a **personalized stretching recommendation feature** (Django, React Native), deriving gender-segmented popularity priors from 80M+ workout records and combining them with per-user history to rank exercises, increasing activation 12%
- Launched the **app's first social feature 0 to 1**, a leaderboard addressing low retention; built an **automated copy testing pipeline** for its push notifications (n8n, APIs, MCPs), growing 340+ user-created clubs and lifting engagement 14%
- Built an **LLM classifier for 2,000+ voice-of-customer items**; investigated pain points through 24+ user interviews, prioritized recurring issues into a PRD and shipped fixes across 8+ sprints, resolving the top pain points driving churn

Parachute

Mar 2024 – Jun 2024

AI Engineer Intern

Houston, TX

- Evaluated **RAG architectures and vector database** options (FAISS, Pinecone, Elasticsearch) against cost, latency, and integration complexity, selecting FAISS to keep the chatbot MVP self-hosted at zero infrastructure cost
- Built **Python ETL pipelines** for automated resume parsing, normalizing inconsistent PDF layouts into a structured schema for matching, improving mentor-mentee matching time by 18%

PROJECTS

Automated A/B Testing System

Oct 2025

Product Engineer

Planfit

- Built an **auto-localization copy optimization system for a multi-language product**, scaling experimentation from a handful of manual tests to 100+ per month with no human input, driving CTA conversion +20% and subscription conversion +8%
- Designed the full loop: LLM-generated variants, significance testing, automatic winner promotion, and challenger regeneration
- **Technologies Used:** n8n, Make.com, Amplitude, Claude Code, GPT API, Django REST APIs, React Native, Google Spreadsheet

CulinAI

Dec 2023

Product & Prompt Engineer

TechTrek from Tech@NYU

- Developed an AI-powered website that allows users to get personalized recipes only based on the food items they already have
- **Technologies Used:** LLaVA, SDXL-Turbo, Replicate, JavaScript, Python, Multimodal prompting, APIs,

TECHNICAL SKILLS & TOOLS

- **Programming & Dev:** Python, Java, TypeScript, JavaScript, SQL, React Native, Django, APIs, AWS, Git, Vercel, Docker, CI/CD
- **AI:** LLM APIs (OpenAI, Anthropic), prompt engineering, RAG, Google ADK, n8n, Make.com
- **Product & Analytics:** PRDs, Amplitude, Figma, Linear, Lovable, User Interviews, A/B testing, Funnel Analysis
