EDUCATION

New York University, College of Arts & Science

Expected May 2027

Bachelor's degree in Computer Science; Minor in Data Science

New York, NY

- **Relevant Coursework:** Agile Software & DevOps, Operating System, Algorithms, Natural Language Processing, Big Data Analysis
Computer System Org, Programming Tools for Data Scientists, Principle of Data Science, Linear Algebra, Discrete Math

WORK EXPERIENCE

TikTok

May 2026 – Present

Client Solutions Manager Intern

Seoul, KR

- Built the Korea team's first **AI-powered marketing performance diagnostic tool**, integrating multiple internal data sources through a scheduled automation pipeline to generate client-ready reports for **170+ cross-functional teammates**
- Developed an **creative intelligence system** using **Aime** that analyzed and labeled **3,000+ ad creatives per account**, automatically auditing TikTok Gaming best practices and generating optimization recommendations for **20+ enterprise clients**
- Established the Korea team's **AI knowledge hub**, translating employee feedback into reusable prompt libraries, workflow templates, and localized AI playbooks that standardized AI workflows across teams in collaboration with TikTok Japan.

Planfit

Mar 2025 – Dec 2025

AI Product Engineer Intern

Seoul, KR

- Drove **+20% community engagement** and **1,000+ user-generated clubs** by owning the **full product lifecycle** of a competition-based leaderboard feature, from discovery and PRD through cross-functional execution and post-launch iteration
- Discovered a new subscription pipeline outside the primary onboarding paywall, driving **+8% subscription** and **+12% activation** via an **AI-powered stretching recommendation feature** informed by 100+ user interviews and weekly VOC meetings
- Optimized onboarding conversion via **100+ A/B tests**, using SQL and Amplitude to identify **funnel drop-offs and drive iteration**

Parachute

Mar 2024 – Jun 2024

AI Engineer Intern

Houston, TX

- Evaluated **RAG architectures and vector database options** (FAISS, Pinecone, ElasticSearch) against cost, latency, and integration complexity to recommend the stack for a career coaching chatbot MVP
- Built Python ETL pipelines for automated resume data extraction, improving mentor-mentee **matching speed by 18%**

PROJECTS

myIndigo

Apr 2026

Full-Stack Developer & AI Engineer

AI Hackathon @ NYU&Google

- Built an **end-to-end real-time audio pipeline** (PCM16 streaming via WebSocket, FastAPI) that classifies ambient sounds via Gemini 2.5 Flash and Google ADK multi-agent orchestration, delivering actionable alerts to iPhone and Apple Watch
- **Technologies Used:** Google ADK, Gemini 2.5 Flash, Web Audio API, FastAPI, WebSocket, Python, React

Automated A/B Testing System

Oct 2025

Product Manager & AI Engineer

Hackathon @ Planfit

- Engineered a full-stack A/B testing system that automatically rotates localized variants (country- and segment-matched copy translations) based on performance, driving **CTA conversion +20%** and **subscription conversion +8%**
- **Technologies Used:** n8n, Make.com, Amplitude, Claude Code, GPT API, Django REST APIs, React Native, Google Spreadsheet

TECHNICAL SKILLS

- **Product:** Amplitude, Figma, Linear, Notion, MCPs, Lovable, n8n, Make.com, Product Roadmap, PRD Development, Sprint Prioritization, A/B Testing, MMM, ROI Analysis, Performance Marketing, Campaign Optimization, Retargeting Strategy
- **Technical:** Python, SQL, JavaScript, Django, Node.js, React, HTML/CSS, AWS, Firebase, Docker, OpenAI Agents SDK, Claude
