## EDUCATION

**New York University**, College of Arts & Science

**Expected May 2027**

*Bachelor's degree in Computer Science | Minor in Data Science - GPA: 3.84/4.0*

*New York, NY*

- **Relevant Coursework:** Agile Software & DevOps, Operating Systems, Algorithms, Natural Language Processing, Computer System Org, Programming Tools for Data Scientists, Programming with AI-Assistant, Linear Algebra, Discrete Math
- **Organizations:** NYU LikeLion (E-Board), Tech@NYU (TechTrek, Mentorship), Product Management Club, Girls Who Code

## WORK EXPERIENCE

### TikTok

**May 2026 – Aug 2026**

*AI Engineer Intern*

*Seoul, KR*

- Built a **Python/SQL marketing diagnostics service** integrating 8 data sources with LLM-generated account analysis to automate Sales reporting; replaced 15+ manual queries, reduced reporting **from 1 hour to under 1 minute**, and reached 170+ daily uses
- Engineered a **multi-stage LLM pipeline with prompt chaining, JSON outputs, and retry logic** to audit 3,000+ ad creatives per account, translating client questions into evaluation criteria and optimization recommendations for 20+ enterprise clients
- Co-authored an internal **AI implementation playbook** with TikTok Japan, Solutions Engineers, and Industry Ops and delivered technical workshops to 100+ customer-facing employees; sessions ranked **#1 and #2** among annual internal Masterclasses

### Planfit

**Mar 2025 – Dec 2025**

*Product Engineer Intern*

*Seoul, KR*

- Owned **end-to-end full-stack development of a stretching recommender** (Django, React Native), from user interviews and PRD through coding, QAs and launch; designed recommendation logic using 80M+ workout records, increasing **activation 12%**
- Launched a **leaderboard feature from 0-to-1**, designing UI/UX and relational database schemas and implementing REST APIs and rank-triggered notifications; iterated through 75+ A/B tests, **reaching 340+ user-created clubs** and lifting **engagement 14%**
- Developed a **multi-source ingestion pipeline and LLM text classifier**, consolidating 2,500+ feedback items from 5+ sources into a unified database; aggregated issue frequencies to surface recurring user problems and ship prioritized fixes across **8+ sprints**

### Parachute

**Mar 2024 – Jun 2024**

*AI Engineer Intern*

*Houston, TX*

- Built **Python ETL pipelines** to normalize inconsistent PDFs into structured layouts, reducing mentor-mentee matching time 18%
- Evaluated FAISS, Pinecone, and Elasticsearch for RAG retrieval across latency, cost, and integration complexity; selected FAISS to deploy a **self-hosted chatbot MVP** without additional infrastructure spending

## PROJECTS

### Automated A/B Testing System

**Oct 2025**

*Product Engineer, Full-Stack*

*Planfit*

- Built an **automated experimentation system** for multilingual copy testing, scaling to 150+ tests per month with no intervention
- Implemented **GPT variant generation, statistical significance checks, and automatic winner promotion**, regenerating challengers for continuous testing; increased **CTA conversion 20%** and **subscription conversion 8%**
- **Technologies Used:** Django REST APIs, GPT APIs, n8n, Amplitude, React Native, Claude Code, Google Sheet

### CulinAI

**Dec 2023**

*Product & Prompt Engineer*

*TechTrek from Tech@NYU*

- Developed an AI-powered website that allows users to get personalized recipes only based on the food items they already have
- **Technologies Used:** LLaVA, SDXL-Turbo, Replicate, JavaScript, Python, Multimodal prompting, APIs

## TECHNICAL SKILLS & TOOLS

- **Languages & Frameworks:** Python, SQL, TypeScript, JavaScript, Java, React, React Native, Next.js, Django, FastAPI
- **Backend & Infrastructure:** REST APIs, PostgreSQL, WebSockets, AWS, Docker, Git, GitHub Actions, CI/CD, Vercel
- **AI & Automation:** LLM APIs (OpenAI, Anthropic, Gemini), Claude Code, Codex, Prompt Engineering, RAG, Google ADK, n8n
- **Product & Tools:** PRDs, Amplitude, Figma, Linear, Lovable, User Interviews, A/B testing, Funnel Analysis
